## Simple Western Certified Antibody Datasheet

Figure 3B: Treatment with LXR623 regulates the expression of pro-apoptotic Noxa, and increased Noxa levels mediate enhanced sensitivity to BH3 mimetics. LN229, T98G, U87, U87-EGFRvIII, and HCT116 cells were treated with increasing concentrations of LXR623 for 72 h. Thereafter, protein lysates were collected and subjected to standard Western blot (LN229, T98G, and U87) or capillary electrophoresis (U87-EGFRvIII and HCT116) for the expression of Usp9X, Mcl-1, Bcl-2, Bcl-xL, Noxa, BIM, and/or actin and Vinculin. In U87-EGFRvIII and HCT116, Vinculin was used in lieu of actin. LN229, T98G, U87, U87-EGFRvIII, and HCT116 cells were treated with LXR623 as described in (A). Thereafter, protein lysates were collected and subjected to capillary electrophoresis for the expression of ABCA1 and Vinculin. LN... See reference below for more information.
