NB300-186**IGSF4A/SynCAM1/CADM1 Antibody**

Product Information	
Unit Size	0.1 ml
Concentration	This product is unpurified. The exact concentration of antibody is not quantifiable.
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Clonality	Polyclonal
Preservative	0.02% Sodium Azide
Isotype	IgG
Purity	Unpurified
Buffer	Whole antisera

Product Description	
Host	Rabbit
Gene Symbol	CADM1
Species	Human, Rat
Immunogen	A synthetic peptide corresponding to the C-terminal region of rat SynCAM/CADM1.

Product Application Details	
Applications	Western Blot, Simple Western, Immunocytochemistry/ Immunofluorescence
Recommended Dilutions	Western Blot 1:1000, Simple Western 1:1000, Immunocytochemistry/ Immunofluorescence 1:2000
Application Notes	<p>This SynCAM/CADM1 antibody can be used for Western blot and Immunocytochemistry/Immunofluorescence. Brain fractions give banding patterns of a core glycosylation population around 50kDa and a slightly higher glycosylated population around 65 kDa. Heterologous cell lysates give a single band around 107kDa. In ICC/IF, membrane staining was observed in SH-SY-5Y cells.</p> <p>In Simple Western only 10 - 15 uL of the recommended dilution is used per data point. Separated by Size-Wes, Sally Sue/Peggy Sue.</p>

Images

Western Blot: IGSF4A/SynCAM1/CADM1 Antibody [NB300-186] - Cells were transfected with the pCMV6-ENTRY control or pCMV6-ENTRY CADM1 cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SynCAM/CADM1.

Immunocytochemistry/Immunofluorescence: IGSF4A/SynCAM1/CADM1 Antibody [NB300-186] - SynCAM/CADM1 antibody was tested in SH-SY-5Y cells with Dylight 488 (green). Nuclei and alpha-tubulin were counterstained with DAPI (blue) and Dylight 550 (red).

Western Blot: IGSF4A/SynCAM1/CADM1 Antibody [NB300-186] - Rat brain and HEK cell lysates showing different glycosylation patterns. Brain fractions give banding patterns of a core glycosylation population around 50kDa and a slightly higher glycosylated population around 65 kDa. The heterologous HEK cell lysates give a single, fully glycosylated, band around 107kDa.

Simple Western: IGSF4A/SynCAM1/CADM1 Antibody [NB300-186] - Simple Western lane view shows a specific band for SynCAM in 0.5 mg/ml of Human Brain lysate. This experiment was performed under reducing conditions using the 12-230 kDa separation system.
