

Simple Western Certified Antibody Datasheet

Simple Western™ analysis of extracts (1 mg/mL) from Human Colon tissue using α-Smooth Muscle Actin (D4K9N) XP® Rabbit mAb #19245. The virtual lane view (left) shows a single target band (as indicated) at 1:10 and 1:50 dilutions of primary antibody. The corresponding electropherogram view (right) plots chemiluminescence by molecular weight along the capillary at 1:10 (blue line) and 1:50 (green line) dilutions of primary antibody. This experiment was performed under reducing conditions on the Jess™ Simple Western instrument from ProteinSimple, a Bio-Techne brand, using the 12–230 kDa Separation Module.
